Summary – CSE(AI) undergraduate, currently in the 2nd year, with experience in full-stack and AI-powered projects. Skilled at building scalable, production-ready applications through hackathons and internships, focusing on real-world impact.

Education

Indira Gandhi Delhi Technical University For Women
B.Tech in Computer Science Engineering (AI) — CGPA: 8.69 / 10
Doon Public School (CBSE)
Class XII: 92.4% — Class X: 96.2%

Aug 2024 – May 2028
Delhi
2024

Skills

Languages Python, JavaScript, C++, R
Web Dev React, Next.js, Node.js, FastAPI
Databases PostgreSQL, Firebase, MongoDB

Core CS Data structures, Algorithms, OOP, DBMS
DevOps Git, GitHub
Tools Postman, Jupyter Notebook, Figma

Experience

Birla Pivot (Aditya Birla Group)
Software Developer Intern — Certificate
Bengaluru, India

June 2025 – July 2025

- Built scalable React components via React Query & Redux, improving maintainability and accelerating data handling.
- Resolved UI/UX issues including tile selection, RFQ flows, and validations; implemented server-side sorting for 1000+ records, enhancing performance by ~25%.
- Optimized APIs by splitting heavy integrations into efficient endpoints, reducing initial render time by ~40%.
- Worked in an Agile environment, contributing to code reviews, testing, and deployment.
- Technologies:** React, Redux, React Query, TanStack Table, REST APIs, Jira, Bitbucket, Jenkins.

Projects

MetroMind: AI-driven Metro Operations Platform (for Kochi Metro Rail Limited)
SIH 2025 Winner – Built AI + CP-SAT multi-objective solvers using Google OR-Tools to automate train induction, standby, and crew rostering, cutting scheduling time from 2 hours to under 5 minutes.
Orchestrated multiple AI agents for conversational interfaces, WhatsApp automation, and ML delay prediction models to forecast metro locations and arrival times with 89% accuracy using multi-factor operational data.
Engineered full-stack FastAPI+Next.js system with RBAC, OTP login, multilingual support (Next-intl), Leaflet maps, and n8n automation workflows for station masters & operators.
Tech: FastAPI, Python, Google OR-Tools, n8n, Gemini AI, XGBoost, Next.js, Three.js, Leaflet, Resend, Firebase.
Code Live Demo Demo Video

December 2025

Complifi: AI-Powered Regulatory Compliance Platform
Designed an end-to-end AI system for Indian enterprises that monitors 5+ regulators (FSSAI, RBI, SEBI, DGFT, Gazette) to automate amendment detection and deliver personalized compliance insights. Developed a scalable backend with Python, FastAPI, PostgreSQL, and ChromaDB for RAG-based semantic retrieval across Indian regulations.
Applied LangChain, prompt chaining, and open-source LLMs (Groq gpt-oss-120b/20b, Llama-3.3-70B) to automate compliance summarization, cutting manual review by 80% via a secure Next.js dashboard with real-time alerts.
Tech: FastAPI, Next.js, RAG, LangChain, ChromaDB, Groq/LLaMA, Python, Web Scraping(BeautifulSoup)
Code Live Demo

August 2025

Sweekaar: Accessible Daily Task Trainer for Neurodivergent Children
Engineered therapeutic platform for children with autism, ADHD & cerebral palsy, using step-by-step task breakdowns to reduce caregiver burden by 40% through structured repetition training.
Developed a real-time object detection (Coco-SSD) and gesture tracking (MediaPipe) pipeline using TensorFlow.js, along with a responsive, WCAG 2.1-compliant React frontend to provide automated guidance and reduce cognitive load.
Tech: TensorFlow.js, Coco-SSD, MediaPipe, React, Computer Vision, Real-time Processing
Code Demo Video

April 2025

Open Source: Contributed to PostgreSQL & Cilium (CNCF), resolving issues in large-scale distributed systems.

Achievements

View Certificates

Winner: Smart India Hackathon (SIH)
1st Place: Phantom Agents Hackathon (Oblivion NSUT)
2nd Place: Hackground India Hackathon
Best WIE Team: Vihaan 8.0 Hackathon (IEEE DTU)
3rd Place: Hack-it-up Hackathon (MSC IGDTUW)
1st Place: Innoquest-Access Ideathon (Microsoft)
2nd Place: Smart Product Design Ideathon (IIITD)
